EXPERIENCE

Private Silicon Valley Startup, Silicon Valley — *Full-stack JavaScript developer*

AUG 2018 - FEB 2020

Project:

Internal tools, Crawlers

Role:

Maintain internal dashboards (Meteor.js, React, Sequelize, Postgres)

Implement a linter tool bot to monitor internal documents against the company's style guides (Cheerio, Quip API)

Implement various crawlers (Puppeteer)

FEB 2020 - PRESENT

Project:

Platform similar to Google Ads mainly focused on the pharma industry (30K+ websites, 100M+ events per month).

Clients could promote certain content to targeted countries, IPs, and specific doctors (JS, Npm, Meteor.js, React, Sequelize, Postgres, Redis, ElasticSearch, RabbitMQ, Cassandra, Apache Hive)

Role:

Implement various features to improve targeting, budget distribution, reporting, etc.

Implement new dashboards and Rest Api-s

Maintain legacy code, investigate, and debug on-call issues

May 2023 - PRESENT

Project:

Rewrite the codebase using Typescript, NestJs (Nx, Yarn, TypeORM, Jest, REST, Graphql, Postgres, Redis, RabbitMQ, ElasticSearch, Clickhouse, Apache Hive)

Role:

Write clean, decoupled, tested, code following

SOLID principles and design patterns

Design and implement various modules for our

new codebase (cache, queues, cookies, search, etc)

Implement various REST endpoints

EDUCATION

Faculty of Natural Sciences, Tirana — *Bachelor of Information and Communications Technology*

SEP 2015 - OCT 2020

Studied basics of IT, OOP, algorithms, graphs,

databases, etc. The average score is 8.73 / 10

SKILLS (💪 desc)

Javascript, TypeScript, Node.js, NestJS, Jest,

Express, Typeorm, Postgres, Docker, Graphql,

RabbitMQ, Redis, ElasticSearch, Sequelize,

MongoDB, React, MUI
